SUMMARY

Software Engineering undergraduate at the **University of Kelaniya**, with a deep interest in system design and architectural modeling. Experienced in implementing Microservices and SOA using Java and JavaScript. Combines technical proficiency in the **C4 model** and data structures with hands-on experience in JWT-based security and database management. Committed to developing high-performance, well-documented software solutions

SKILLS

Full-Stack Web Development

Frontend: React.js, HTML5, CSS3, JavaScript (ES6+)

Backend: Node.js, Express.js

Database: MongoDB (NoSQL)

Backend Development

Frameworks: Spring Boot, Spring Security (JWT)

Architecture: Microservices, SOA, RESTful API design

Tools: Maven, Hibernate/JPA

Software Architecture & Modeling

Visual Modeling: C4 Model (Context, Container, Component diagrams), UML

Methodologies: Object-Oriented Programming (OOP), Gap Analysis, Stakeholder Management

Optimization: Business Systems Modeling and system design patterns.

Database Systems

NoSQL: MongoDB (Mongoose)

SQL: MySQL, PostgreSQL

Problem-Solving

Adaptability

Technical Communication

Team Collaboration

LANGUAGES

English

● ● ● ● ●
Professional working proficiency. Capable of drafting formal technical documentation, delivering project presentations and collaborating in international development environments.

Sinhala

Native

● ● ● ● ●

CERTIFICATES

IEEEExtreme (Global Programming Competition)

Competed in a **24-hour global competitive programming challenge** against thousands of teams worldwide.

- Solved complex algorithmic and mathematical problems using **[mention the language you used, e.g., Java or C++]**.
- Demonstrated high endurance, rapid problem-solving, and effective team collaboration under intense time constraints.

PROJECTS

VisitCeylonX - Tourism Management System

04/2026 – Present

Full-Stack Web Application (MERN Stack)

Designed and developed a comprehensive tourism platform to digitize local travel experiences in Sri Lanka.

Employee Management & Stall Reservation System(group)

01/2026 – 04/2026

Backend-Focused Group Project (Spring Boot & React)

Engineered a secure administrative portal for internal organizational management.

Scoop Heaven - Ice Cream Management Site

08/2025 – 02/2026

Web Development Project (PHP & MySQL)

Developed a dynamic e-commerce application for an ice cream parlor, featuring a complete customer-to-admin workflow.
